

Module 16 — High Income Prompting

Topics: Business Use Cases, Reports, Decisions

Assignment: Premium Service Create Karo

Is assignment mein ek premium AI prompting service design ki gayi hai jo businesses ko reports banane, information analyze karne aur business decisions ke liye structured support provide karegi. Service ka focus sirf prompts dena nahi, balkay complete business solution deliver karna hai.

1. Premium Service ka Naam

Service Name: AI Business Intelligence & Decision Support Service

Is service mein AI prompting techniques ko business problems solve karne ke liye use kiya jayega. Client apna business data, problem ya goal provide karega aur us ke basis par structured report, analysis aur possible options tayar kiye jayenge.

2. Target Clients

- Small aur medium businesses.
- Online stores aur e-commerce businesses.
- Marketing agencies.
- Restaurants aur local businesses.
- Startups aur freelancers.
- Aise business owners jo reports aur analysis mein time bachana chahte hain.

3. Business Use Cases

Use Case	AI Service ka Kaam
Market Analysis	Market information ko organize aur summarize karna
Competitor Research	Competitors ki public information ka comparison
Customer Analysis	Customer feedback aur data se common patterns identify karna
Marketing Report	Campaign performance ko structured report mein convert karna
Content Strategy	Business ke liye content ideas aur strategy banana
Decision Support	Available options ke pros, cons aur risks ko organize karna

4. Premium Report Package

Client ko sirf raw AI answer nahi diya jayega. Har project ko professional report ki form mein deliver kiya jayega.

- Executive Summary: Business problem ka short summary.

- Key Findings: Important observations aur patterns.
- Data/Information Analysis: Available information ka structured analysis.
- Options: Possible solutions ya business options.
- Risk & Limitation: Important risks, assumptions aur missing information.
- Action Plan: Agle practical steps.

5. Decision Support System

Agar client ko do ya zyada business options mein comparison chahiye ho, system har option ko same criteria par analyze karega. Final business decision client khud karega; service ka kaam facts, assumptions, trade-offs aur relevant information ko clear format mein present karna hoga.

Criteria	Option A	Option B
Cost	Low / Medium / High	Low / Medium / High
Expected Benefit	Analysis	Analysis
Risk	Identified risks	Identified risks
Time Required	Estimate	Estimate
Resources	Required resources	Required resources

6. Premium Prompt Structure

Role: Senior Business Analyst

Goal: Client ke business problem ka structured analysis tayar karna.

Context: Business type, target customer, budget, goals aur available data.

Instructions: Information ko analyze karo, assumptions clearly mention karo, options compare karo aur actionable next steps do.

Constraints: Facts aur assumptions ko separate rakho; missing data ko identify karo; unsupported claims na banao.

Output: Executive Summary, Findings, Options, Risks, Action Plan.

7. Client Workflow

Step	Process
1	Client se requirements aur business goal lena
2	Available data/information collect karna
3	Prompt framework ke through AI analysis karna
4	Report ko human review aur quality check se guzarana
5	Client ko professional PDF/report deliver karna
6	Client feedback ke mutabiq limited revisions karna

8. Pricing Plan

Package	Deliverables	Example Price
Basic	1 short analysis + summary report	15,000 PKR
Professional	Detailed report + comparison + action plan	30,000 PKR
Premium	Multiple reports + decision support + strategy session	60,000 PKR

Note: Pricing example hai. Actual price project ke scope, data, research, revisions aur delivery requirements ke mutabiq set ki ja sakti hai.

9. Premium Service ki Value

- Client ka research aur reporting time kam hota hai.
- Business information organized format mein milti hai.
- Repeated analysis ke liye reusable prompt systems ban sakte hain.
- Reports professional aur easy-to-understand format mein deliver hoti hain.
- Decision-making ke liye options, trade-offs aur risks clear kiye ja sakte hain.

10. Important Quality Rules

- AI ke output ko blindly final answer na samjha jaye.
- Important business information ko verify kiya jaye.
- Facts, assumptions aur estimates ko clearly separate kiya jaye.
- Confidential client data ko responsibly handle kiya jaye.
- High-stakes decisions mein qualified human professional ki review zaroori ho sakti hai.

11. Conclusion

High Income Prompting ka purpose sirf achay prompts likhna nahi, balkay prompts ko business value mein convert karna hai. Is premium service mein AI ko business use cases, reports aur decision support ke liye use kiya gaya hai. Professional workflow, quality checking aur clear deliverables ki wajah se prompt skill ko ek sellable service mein convert kiya ja sakta hai.
