

# Module 17 — Portfolio Project

Topics: Full System Build, Optimization

## Assignment: Fiverr-Ready Project Banao

Is assignment mein ek complete AI Prompt Automation project ko Fiverr par service ke taur par present karne ke liye tayar kiya gaya hai. Project ka goal client ko sirf ek prompt dena nahi, balkay ek organized AI content system provide karna hai jo repeatable aur optimize kiya ja sake.

### 1. Project ka Naam

AI Content & Social Media Automation System

Yeh system businesses ke liye topic se social media content tak ka workflow automate karta hai. Client topic aur basic business information deta hai aur system content ideas, captions, posts, hashtags aur content calendar generate karne mein help karta hai.

### 2. Target Clients

- Small businesses aur startups.
- Restaurants aur cafes.
- Online stores aur e-commerce sellers.
- Coaches, consultants aur freelancers.
- Social media managers aur marketing agencies.

### 3. Full System Build

| Stage            | System ka Kaam                                                      |
|------------------|---------------------------------------------------------------------|
| Input            | Business type, audience, topic aur content goal lena                |
| Research         | Provided information ko organize aur relevant points identify karna |
| Idea Generation  | Multiple content ideas generate karna                               |
| Content Creation | Selected idea par post/caption tayar karna                          |
| Optimization     | Tone, clarity, CTA aur structure improve karna                      |
| Quality Check    | Grammar, repetition aur unsupported claims check karna              |
| Output           | Final post, caption, hashtags aur calendar-ready content            |

### 4. Main Prompt System

Role: Expert Social Media Content Strategist

Goal: Client ke business ke liye useful aur audience-focused content create karna.

Context: Business type, target audience, platform, brand tone aur content goal.

Instructions: Pehle ideas do, phir selected idea ko post mein convert karo, clear CTA add karo aur platform ke mutabiq format optimize karo.

Constraints: Fake facts na banao, unnecessary repetition na karo, brand tone maintain karo.  
Output: Hook + Main Content + CTA + Caption + Hashtags.

## 5. Example Project

Client: Local Cafe

Goal: Instagram aur Facebook ke liye regular promotional content banana.

Input: Cafe ka menu, target customers, special offers aur brand tone.

Output: 10 content ideas, 5 complete social posts, captions, CTAs aur relevant hashtags.

## 6. Optimization Process

- Weak prompts ko detailed prompts mein convert karna.
- Output format ko fixed rakhna taake results consistent hon.
- Examples add karna taake AI desired style samajh sake.
- Unnecessary instructions remove karna.
- Har output ke baad quality checklist use karna.
- Client feedback ko prompt system mein incorporate karna.

## 7. Quality Checklist

| Check       | Question                                          |
|-------------|---------------------------------------------------|
| Accuracy    | Kya information available data ke mutabiq hai?    |
| Clarity     | Kya content asani se samajh aa raha hai?          |
| Audience    | Kya content target audience ke liye relevant hai? |
| Brand Tone  | Kya brand ka tone maintain hai?                   |
| CTA         | Kya clear call-to-action diya gaya hai?           |
| Originality | Kya unnecessary repetition se bachaya gaya hai?   |

## 8. Fiverr Gig Title

I will create an AI powered content system and prompts for your business

## 9. Fiverr Gig Description

Main businesses ke liye custom AI content systems aur prompt workflows create karungi jo content creation ko organized aur repeatable banane mein help karte hain.

Aap ko mil sakta hai:

- Custom prompt system
- Content ideas aur templates
- Social media captions

- Content workflow
- Optimization aur quality checklist
- Basic documentation

Har project client ke business, audience aur requirements ke mutabiq customize kiya jayega.

## 10. Fiverr Packages

| Package  | Deliverables                                                      | Example Price |
|----------|-------------------------------------------------------------------|---------------|
| Basic    | 5 prompts + 10 content ideas                                      | 15,000 PKR    |
| Standard | Full prompt system + 20 ideas + templates                         | 30,000 PKR    |
| Premium  | Complete content system + workflow + optimization + documentation | 60,000 PKR    |

Note: Yeh example pricing hai. Fiverr par final pricing project scope, delivery time, revisions aur client requirements ke mutabiq adjust ki ja sakti hai.

## 11. Client Requirements

- Business ka naam aur type.
- Target audience.
- Preferred platform: Instagram, Facebook, LinkedIn ya doosra platform.
- Brand tone: professional, friendly, simple etc.
- Main products/services.
- Content goals.
- Examples ya existing content, agar available ho.

## 12. Delivery Process

- Client requirements receive karna.
- Project scope confirm karna.
- Prompt system aur workflow build karna.
- Sample outputs create karna.
- Quality check aur optimization karna.
- Final files/documentation client ko deliver karna.
- Agreed revisions complete karna.

## 13. Portfolio mein Kya Show Karna Hai?

- Project ka short introduction.
- Before/After prompt example.
- Workflow diagram.

- Sample AI outputs.
- Quality checklist.
- Sample content calendar.
- Final deliverables ka screenshot ya PDF preview.

## 14. Project Optimization

Project ko optimize karne ke liye prompts ko reusable templates mein convert kiya jayega. Output format fixed rakha jayega, quality checklist use hogi aur client feedback ke basis par workflow ko improve kiya jayega. Is se system ko different businesses ke liye customize karna asan hoga.

## 15. Conclusion

Fiverr-ready project banane ke liye ek complete system, clear deliverables aur professional presentation zaroori hain. Is project mein AI content automation ko full workflow ke saath design kiya gaya hai. Prompt system, optimization, quality checking, packages aur delivery process ko portfolio mein show karke service ko client-facing project ki form di ja sakti hai.
