

Assignment: Weak Prompt Improve Karna

Topics: Debugging, Iteration, Hallucination Control

Is assignment mein weak prompts ko identify karke unhein clear, specific aur effective prompts mein convert kiya gaya hai.

1. Debugging

Weak Prompt: Mera code check karo.

Weak Prompt Ki Problems:

- Code ya programming language specify nahi ki gayi.
- Error message provide nahi kiya gaya.
- AI se expected task clear nahi hai.
- Corrected code aur explanation ka format nahi diya gaya.

Improved Prompt: Tum aik experienced Python programmer ho. Neeche diye gaye Python code ko debug karo. Pehle error identify karo, phir error ki wajah simple Roman Urdu mein explain karo, us ke baad corrected code do. Agar multiple errors hon to har error ko number ke sath explain karo. Original code ki functionality ko jitna mumkin ho preserve rakho.

2. Iteration

Weak Prompt: Is answer ko better karo.

Weak Prompt Ki Problems:

- Ye clear nahi ke answer mein kya improve karna hai.
- Tone, length aur audience specify nahi ki gayi.
- Improvement ke criteria nahi diye gaye.
- Revision ka process clear nahi hai.

Improved Prompt: Neeche diye gaye answer ko 2 iterations mein improve karo. Iteration 1 mein grammar, clarity aur structure improve karo. Iteration 2 mein language ko concise aur student-friendly banao. Har iteration ke baad short list do ke kya changes kiye gaye. Final version Roman Urdu mein do aur original meaning ko change na karo.

3. Hallucination Control

Weak Prompt: Is topic par complete information do.

Weak Prompt Ki Problems:

- Topic aur required information clear nahi hai.
- Sources ya evidence ki requirement nahi di gayi.
- AI ko uncertainty handle karne ka rule nahi diya gaya.
- Facts aur assumptions ko separate karne ki instruction nahi hai.

Improved Prompt: Is topic par sirf reliable aur verifiable information provide karo. Agar kisi fact ki confirmation available na ho to clearly likho: 'Is information ki tasdeeq nahi ho saki.' Facts, estimates aur assumptions ko alag rakho. Fake names, statistics, dates ya sources mat banao. Jahan possible ho, information ke source ya reference ka naam mention karo. Agar user ka sawal ambiguous ho to pehle clarification mango.

Comparison Summary

Topic	Weak Prompt	Improved Prompt Mein Kya Add Hua?
Debugging	Mera code check karo.	Language, error identification, explanation aur corrected code.
Iteration	Is answer ko better karo.	2 improvement rounds, clear criteria aur changes ki list.
Hallucination Control	Complete information do.	Verification, uncertainty rule, sources aur facts/assumptions separation.

Conclusion

Weak prompt ko improve karne ke liye clear role, specific task, context, instructions aur output requirements deni chahiye. Debugging mein error details, iteration mein improvement steps aur hallucination control mein verification aur uncertainty rules add karna useful hota hai.
